

# ORE

COMPLEX  
OREBODIES 2018

*Ensuring future mineral supply, by exploring solutions to facilitate the development of orebodies with technical, political, social and environmental challenges*

BRISBANE  
19-21 NOVEMBER

[#complexorebodies2018](https://twitter.com/complexorebodies2018)

## About the conference

The Complex Orebodies conference aims to attract a wide range of contributors willing to share their experiences and insights into this crucial issue. Corporate leaders, operators, service providers, financial institutions and researchers are invited to contribute case studies, perspectives on important issues, and unique solutions to the variety of challenges across the entire range of development activities

Contributions are sought from all global jurisdictions, across the entire spectrum of disciplines. Insights will be gained from case studies of existing complex orebodies; analysis of the future technical, social, political and environmental landscape as it affects mining; and from contributions detailing innovative extraction approaches with potential to revolutionise mineral supply.

Visit the website [complexorebodies.ausimm.com](http://complexorebodies.ausimm.com) for up to date news and information.

## Conference Themes

- Current complex orebodies – technical, political, social and environmental challenges and solutions
- Meeting future challenges, standards and expectations - the changing landscape of acceptable practice
- Transformative technologies to open up new extractive possibilities
- Defining and understanding complexity as it applies to the entire mining life cycle
- Trends and challenges of future metal supply

## Call for papers open

Abstract submissions for Complex Orebodies 2018 are now open. Please submit your abstract not exceeding 300 words, in English, to Mia Wotherspoon, [mwotherspoon@ausimm.com.au](mailto:mwotherspoon@ausimm.com.au)
